Schedule

Preliminary

To the purchaser:

The purpose of a statement under section 7 of the *Land and Business (Sale and Conveyancing) Act 1994* is to put you on notice of certain particulars concerning the land to be acquired.

If you intend to carry out building work on the land, change the use of the land or divide the land, you should make further inquiries to determine whether this will be permitted. For example, building work may not be permitted on land not connected to a sewerage system or common drainage scheme if the land is near a watercourse, dam, bore or the River Murray and Lakes.

The *Aboriginal Heritage Act 1988* protects any Aboriginal site or object on the land. Details of any such site or object may be sought from the "traditional owners" as defined in that Act.

If you desire additional information, it is up to you to make further inquiries as appropriate.

Instructions to the vendor for completing this statement:

means the Part, Division, particulars or item may not be applicable.

If it is applicable, ensure the box is ticked and complete the Part, Division, particulars or item.

If it is not applicable, ensure the box is empty or strike out the Part, Division, particulars or item. Alternatively, the Part, Division, particulars or item may be omitted, but not in the case of an item or heading in the table of particulars in Division 1 of the Schedule that is required by the instructions at the head of that table to be retained as part of this statement.

** means strike out or omit the option that is not applicable.*

All questions must be answered with a YES or NO (inserted in the place indicated by a rectangle or square brackets below or to the side of the question).

If there is insufficient space to provide any particulars required, continue on attachments.

To the purchaser:

Right to cool-off (section 5)

1—Right to cool-off and restrictions on that right

You may notify the vendor of your intention not to be bound by the contract for the sale of the land UNLESS—

- (a) you purchased by auction; or
- (b) you purchased on the same day as you, or some person on your behalf, bid at the auction of the land; or
- (c) you have, before signing the contract, received independent advice from a legal practitioner and the legal practitioner has signed a certificate in the prescribed form as to the giving of that advice; or
- (d) you are a body corporate and the land is not residential land; or
- (e) the contract is made by the exercise of an option to purchase not less than 5 clear business days after the grant of the option and not less than 2 clear business days after service of this form; or
- (f) the sale is by tender and the contract is made not less than 5 clear business days after the day fixed for the closing of tenders and not less than 2 clear business days after service of this form; or
- (g) the contract also provides for the sale of a business that is not a small business.

2—Time for service

The cooling-off notice must be served—

- (a) if this form is served on you before the making of the contract—before the end of the second clear business day after the day on which the contract was made; or
- (b) if this form is served on you after the making of the contract—before the end of the second clear business day from the day on which this form is served.

However, if this form is not served on you at least 2 clear business days before the time at which settlement takes place, the cooling-off notice may be served at any time before settlement.

3—Form of cooling-off notice

The cooling-off notice must be in writing and must be signed by you.

4—Methods of service

The cooling-off notice must be—

- (a) given to the vendor personally; or
- (b) posted by registered post to the vendor at the following address:
32 MARITIME AVENUE SELICKS BEACH SA 5174
(being the vendor's last known address); or
- (c) transmitted by fax or email to the following fax number or email address:
EMAIL: JOHNL@OCRE.COM.AU NICKV@OCRE.COM.AU
(being a number or address provided to you by the vendor for the purpose of service of the notice); or
- (d) left for the vendor's agent (with a person apparently responsible to the agent) at, or posted by registered post to the agent at, the following address:
210 GREENHILL ROAD EASTWOOD SA 5063
(being the agent's address for service under the *Land Agents Act 1994*)

Note—Section 5(3) of the *Land and Business (Sale and Conveyancing) Act 1994* places the onus of proving the giving of the cooling-off notice on the purchaser. It is therefore strongly recommended that—

- (a) if you intend to serve the notice by leaving it for the vendor's agent at the agent's address for service or an address nominated by the agent, you obtain an acknowledgment of service of the notice in writing;
- (b) if you intend to serve the notice by fax or email, you obtain a record of the transmission of the fax or email.

5—Effect of service

If you serve such cooling-off notice on the vendor, the contract will be taken to have been rescinded at the time when the notice was served. You are then entitled to the return of any money you paid under the contract other than—

- (a) the amount of any deposit paid if the deposit did not exceed \$100; or
- (b) an amount paid for an option to purchase the land.

Proceeding with the purchase

If you wish to proceed with the purchase—

- (a) it is strongly recommended that you take steps to make sure your interest in the property is adequately insured against loss or damage;
- (b) pay particular attention to the provisions in the contract as to time of settlement - it is essential that the necessary arrangements are made to complete the purchase by the agreed date - if you do not do so, you may be in breach of the contract;
- (c) you are entitled to retain the solicitor or registered conveyancer of your choice.

Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)

Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:

- a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
- b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
- c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*; section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (<https://1100.com.au>) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

Land Tax Act 1936 and Regulations thereunder

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

Animal and Plant Control (Agriculture Protection and other purposes) Act 1986 and Regulations

Agents should note that this legislation imposes a responsibility on a landholder to control and keep controlled proclaimed plants and particular classes of animals on a property.

Information should be obtained from:

- The vendor about the known presence of proclaimed plants or animals on the property including details which the vendor can obtain from records held by the local animal and plant control board
- The local animal and plant control board or the Animal and Plant Control Commission on the policies and priorities relating to the control of any serious proclaimed plants or animals in the area where the property is located.

ANNEXURE "A"

BUILDING GUIDELINES

1. All plans and specifications, construction details for any proposed development on the Allotment including the dwelling, garaging, fencing, outbuildings and other structures including antennae and air conditioners are to be submitted to Prodec Pty. Ltd. or its nominated representative for approval prior to the Encumbrancer seeking Council development consent and prior to the commencement of any construction works on the Allotment.
2. Development should be consistent with and complement and enhance the seaside character of the Sellicks Beach area. The incorporation of coastal architectural forms, materials and colours for external areas is encouraged (as distinct from more "suburban" style buildings).
3. Dwellings on Allotments 1-22 inclusive and Allotment 46 should be designed facing the foreshore whilst the rear of such dwellings abutting the public road should be designed with a sense of "address" and with a pleasant appearance from the road.
4. There shall be a minimum of 1000mm building set back from one side boundary of each Allotment and at least a 4000mm set back from the front coastal boundary of Allotments 1 to 22 inclusive and Allotment 46. Nothing herein shall prevent the establishment of patio areas and decking at ground level within this 4000mm set back area of these Allotments.
5. Owners of Allotments 1-22 and Allotment 46 shall install a 1200mm high, open style tubular fence in a style and profile acceptable to both Prodec Pty. Ltd. and the Council to the front coastal boundary of the Allotment within six calendar months of settlement.
6. Transportable buildings are not permitted on the Allotment.
7. Buildings should be constructed using lightweight cladding, quality limestone and or rendered stone or masonry. Face brickwork is not encouraged unless it is a material essential to the architectural character of the dwelling and a suitable argument is presented for its inclusion.
8. No aerials, antennae, solar panels, air conditioning units or other roof mounted structures shall protrude above the ridge line of the roof and are to be located to minimise their impact on public or neighbour's view.
9. Where possible, free standing garages and outbuildings should be designed to be incorporated as part of the main dwelling and consistent with the style, and of the same colour and materials as the dwelling. Free standing garages, outbuildings and fences are not to be constructed using plain galvanized iron, zincalume, face brick or stone or fibre cement sheeting. Solid panel fencing is not permitted within any required front or rear building set back area.
10. A variety of roof structures, forms and roofing materials is encouraged but pitched roofs are to have a minimum pitch of 30°. Fibre cement and uncoated galvanised iron or zincalume roofing is not permitted. Flat roofs are acceptable only if they are designed as an integral part of and complement the seaside character of the dwelling.
11. The maximum height of the dwelling is to be 9000mm from existing ground level to the highest point of the roof.
12. Dwellings should be carefully designed to include a high degree of architectural form and to incorporate articulated roof designs, large decks, verandahs or porches, large window areas and courtyards which take advantage of winter sun and provide protection from prevailing winds

1.4 Accuracy of Recitals

The parties acknowledge that the Recitals are true and accurate and agree that they form part of this Agreement.

2. Stormwater and Drainage – Lot 3000

- 2.1. There is a gully/channel which from time to time carries stormwater adjacent to the southern boundary of the land (the channel). The channel is located partly in Lot 3000 and partly within Council's road reserve. The Council is investigating the flow of water carried in the channel including the catchment area for the channel.
- 2.2. The Council has indicated that it may require Lot 3000 for the purposes of a drainage reserve. As at the time of this Agreement Council is not able to say whether it requires all or any of Lot 3000 for drainage purposes until such time that it completes and adopts certain design works associated with the existing channel. However the Landowners have agreed to transfer Lot 3000 as a drainage reserve to the Council at no cost to the Council upon lodgement of the Deposited Plan at the Lands Title Office.
- 2.3. In the event that Council does not require any or all of Lot 3000 Council agrees (subject to Ministerial approval) to transfer back to the Landowners or their nominee at no cost to the Council all or that part of Lot 3000 not required by the Council for drainage purposes. - 2.4. Council agrees that 50% of the area of Lot 3000 shall be treated as a reserve for the purposes of any open space contribution required under the Development Act in respect of any application(s) that may be made to further divide the balance of the land not shown as Residential Allotments on the Plan.

3. Effluent/sewage treatment

- 3.1. Subject to Clause 3.8, prior to the human occupation of any building on any portion of the land, and in any case within one year of the day upon which the Registrar-General deposits the Plan, the Landowners and/or Prodec must construct on Allotment 1002 on the Plan a package treatment plant for the treatment of effluent or sewage from the Residential Allotments ("the Plant"). The Plant must have the capacity to treat effluent or sewage from at least 3.5 people per created Residential Allotment on any day ("the capacity") provided that upon application by the Landowners and/or Prodec, the Council may in its absolute discretion permit the occupation of a building or buildings on the land at a time when the capacity of the plant is less than the finished capacity. Disinfection shall involve the use of artificial ultraviolet light or such other mutually acceptable processes.

- 3.2 The design and construction of the Plant shall be such so as to enable possible future connection to the Plant by other allotments within the land and/or from areas outside the land. In the event that the plant is to be used by allotments not forming portion of the land then all costs incurred to connect such land including any associated expansion of the Plant shall not be borne by either the Landowners or Prodec. However any cost associated with the modular increase in the capacity of the Plant for the purposes of servicing the allotments forming part of the land shall be borne by the Landowners as at the time of the modular increase.
- 3.3 Any treatment Plant shall include appropriate provision so as to minimise sludge removal frequency.
- 3.4 The Landowners and/or Prodec will provide a subsurface irrigation system from the Plant to enable the effective and safe distribution onto the areas specified on the Plan and at a discharge rate of 4.5 litres per square metre per day continuously throughout the year.
- 3.5 Upon completion of the Plant the Landowners and/or Prodec shall own and operate the plant for a period of 5 years at their cost. However the parties agree that Council may in its discretion serve a Notice on the Landowners requiring the Landowners to transfer the Plant and Allotment 1002 on the Plan to the Council at no cost to the Council and for nil consideration. Such Notice is to be given by the Council prior to the construction of the Plant. In the event Notice is given and the Plant transferred to the Council, the Council shall operate and maintain the plant for the benefit of the Residential Allotments. Further information held by council

Does the council hold details of any development approvals relating to:

NO

- (a) commercial or industrial activity at the land; or
- (b) a change in the use of the land or part of the land (within the meaning of the *Development Act 1993*) or the *Planning, Development and Infrastructure Act 2016*?

Note –

The question relates to information that the council for the area in which the land is situated may hold. If the council answers “YES” to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.

A “YES” answer to paragraph (a) of the question may indicate that a potentially contaminating activity has taken place at the land (see sections 103C and 103H of the Environment Protection Act 1993) and that assessments or remediation of the land may be required at some future time.

It should be noted that –

- the approval of development by a council does not necessarily mean that the development has taken place;
- the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.

General

Easement

YES

Does a Council drainage easement exist? – Refer to Certificate of Title of subdivision plans (ie Deposited Plans, Community Plans, File Plans etc) for details of easements in the interests of other State Departments or Agencies).

Easements over private land may show on a certificate of title and indicate that council or another authority have some form of infrastructure within them, such as stormwater drainage pipes or other services. Refer to [Encroachment over council easements](#) on our website for further information.

Are you aware of any encroachment on the Council easement? **Shed**

YES

Important information to the owner about Council’s rights when there is an approved or unapproved encroachment in, on or above a drainage easement:

Council requires free, unrestricted and unobstructed access to the drainage easement for construction, maintenance and operational purposes;

Council will endeavour to provide one months’ notice for any planned work that requires access to the easement.

In an emergency Council will require immediate access to the easement;

Approved encroachments do not diminish Council's rights to the easement and may be removed (if required) at the owners cost;

Reinstatement of an approved encroachment at the owners cost may be approved or may require modification;

Unapproved encroachments or property improvements in, on or above the easement that do not meet relevant building and engineering standards may be removed at the owners cost and may not be approved to be reinstated.

Buyers information notice

Prescribed notice to be given to purchaser

Before you buy a home there are a number of things that you should investigate and consider. Though it may not be obvious at the time, there could be matters that may affect your enjoyment of the property, the safety of people on the property or the value of the property.

The following questions may help you to identify if a property is appropriate to purchase. In many cases the questions relate to a variety of laws and standards. These laws and standards change over time, so it is important to seek the most up to date information. Various government agencies can provide up to date and relevant information on many of these questions. To find out more, Consumer and Business Services (CBS) recommends you check the website: www.cbs.sa.gov.au.

Consider having a professional building inspection done before proceeding with a purchase. A building inspection will help you answer some of the questions below.

The questions have been categorised under the headings **Safety**, **Enjoyment** and **Value**, but all issues are relevant to each heading.

Safety

- Is there **asbestos** in any of the buildings or elsewhere on the property e.g. sheds and fences?
- Does the property have any significant **defects** e.g. **cracking** or **salt damp**? Have the wet areas been waterproofed?
- Is the property in a **bushfire** prone area?
- Are the **electrical wiring, gas installation, plumbing and appliances** in good working order and in good condition? Is a **safety switch** (RCD) installed? Is it working?
- Are there any prohibited **gas appliances** in bedrooms or bathrooms?
- Are **smoke alarms** installed in the house? If so, are they hardwired? Are they in good working order and in good condition? Are they compliant?
- Is there a **swimming pool and/or spa pool** installed on the property? Are there any safety barriers or fences in place? Do they conform to current standards?
- Does the property have any **termite** or other pest infestations? Is there a current preventive termite treatment program in place? Was the property treated at some stage with persistent organochlorins (now banned) or other **toxic** termiticides?
- Has fill been used on the site? Is the soil contaminated by **chemical residues** or waste?
- Does the property use **cooling towers** or manufactured warm water systems? If so, what are the maintenance requirements?

Enjoyment

- Does the property have any **stormwater** problems?
- Is the property in a **flood prone** area? Is the property prone to coastal flooding?
- Does the property have an on-site **wastewater treatment facility** such as a septic tank installed? If so, what are the maintenance requirements? Is it compliant?
- Is a **sewer mains connection** available?
- Are all gutters, downpipes and stormwater systems in good working order and in good condition?
- Is the property near **power lines**? Are there any trees on the property near power lines? Are you considering planting any trees? Do all structures and trees maintain the required clearance from any power lines?
- Are there any **significant** trees on the property?
- Is this property a unit on **strata or community title**? What could this mean for you? Is this property on strata or community title? Do you understand the restrictions of use and the financial obligations of ownership? Will you have to pay a previous owner's debt or the cost of planned improvements?
- Is the property close to a hotel, restaurant or other venue with entertainment consent for live music? Is the property close to any industrial or commercial activity, a busy road or airport etc that may result in the generation of **noise** or the **emission of materials or odours** into the air?
- What appliances, equipment and fittings are included in the sale of the property?
- Is there sufficient car parking space available to the property?

Value

- Are there any **illegal or unapproved additions**, extensions or alterations to the buildings on the property?

Is the property connected to a water meter that is also serving another property?
- Are there water taps outside the building? Is there a watering system installed? Are they in good working order and in good condition?
- Does the property have **alternative sources** of water other than mains water supply (including **bore or rainwater**)? If so, are there any special maintenance requirements?

IMPORTANT NOTICE
SMOKE ALARM LEGISLATION

Legislation relating to smoke alarms came into force on the 1st day of February 1998.

- If the home you are purchasing was built on or after the 1st of January 1995, then it should already have an operational mains powered smoke alarm installed. If not, it is the responsibility of the vendor to install it prior to settlement at the vendor's cost.
- If the home was built prior to the 1st of January 1995, but purchased by the vendor on or after 1st February 1998, then it should already have either an operational mains powered smoke alarm installed, or one powered by 10 year life, non-replaceable, non-removeable permanently connected batteries. Again, it is the responsibility of the vendor to install such an alarm prior to settlement, and at the vendor's cost.
- In all other cases, the home you are buying must have at least, a battery operated smoke alarm which you are required to upgrade to mains power (or an alarm fitted with 10 year life, non-replaceable, non-removeable permanently connected batteries) within six months of the date of purchase. It is recommended that at least one smoke alarm be installed on each floor of a multi storey dwelling.

The smoke alarms must be installed by a licensed electrician and must comply with the Australian Standard. A maximum penalty of \$750.00 for a breach of the legislation applies.

Besides this penalty, there is also a risk that damage caused by fire to a dwelling, which does not have a smoke alarm installed as required under the legislation, may not be covered by insurance.
